COEFFICIENT MULTIPLIERS OF BERGMAN SPACES $A^p$, II

Dedicated to my teachers

ZENGIJAN LOU

ABSTRACT. We show that the multiplier space $(A^1, X) = \{ g : M_{g_n}(r, g') = O(1 - r)^{-1}\}$, where $X$ is BMOA, VMOA, $B, B_0$ or disk algebra $A$. We give the multipliers from $A^1$ to $A^q(H^q)(1 \leq q \leq \infty)$, we also give the multipliers from $F(1 \leq p \leq 2)$, $C_0$, BMOA, and $H^p(2 \leq p < \infty)$ into $A^q(1 \leq q \leq 2)$.
