

# Nondegeneracy for Lie Triple Systems and Kantor Pairs

*Dedicated to the memory of Issai Kantor (1936–2006)*

Esther García, Miguel Gómez Lozano, and Erhard Neher

*Abstract.* We study the transfer of nondegeneracy between Lie triple systems and their standard Lie algebra envelopes as well as between Kantor pairs, their associated Lie triple systems, and their Lie algebra envelopes. We also show that simple Kantor pairs and Lie triple systems in characteristic 0 are nondegenerate.
